6 Courses

ILLINOIS

October 22, 2015

Hyunjong Lee

has successfully completed the online, non-credit Specialization

Data Mining

A sequence of five courses followed by a final 6-week project that allows you to apply the skills learned throughout the courses.

The Data Mining Specialization teaches data mining techniques for both structured data which conform to a clearly defined schema, and unstructured data which exist in the form of natural language text. Specific course topics include pattern discovery, clustering, text retrieval, text mining and analytics, and data visualization. The Capstone project task is to solve real-world data mining challenges using a restaurant review data set from Yelp.
